

CARBON CALCULATED

Measure | Verify | Manage

Everyday words at Carbon Calculated include Carbon Footprint, Greenhouse Gas (GHG) Emissions, Carbon Tax and Climate Change – amongst others. Our vocabulary is therefore related to the amount of GHGs emitted into the atmosphere by the activities of a project, company or country.

Carbon Calculated can guide you on how to take the responsible approach to measuring, reporting and minimising CO₂e emissions in all facets of your business.

OUR KNOWLEDGE Carbon Calculated was founded in 2008. Since then the business has grown in stature, becoming one of South Africa's leading companies in carbon management.

All Carbon Calculated's reporters are trained through the Greenhouse Gas Management Institute, endorsed by the World Resources Institute (WRI) and the World Business Council for Sustainable Development (WBCSD).

OUR SKILLS We interpret and advise on **cost effective carbon footprint measurements, Carbon Disclosure Project (CDP) submissions, verification and carbon-related cost savings.** In addition, Carbon Calculated holds executive feedback sessions with top-level management on their carbon footprint status and the wider carbon/climatechange environment.

YOUR CARBON FOOTPRINT – WHY MEASURE?

 **Environmental reporting**
Meeting the Global Reporting Initiative (GRI); Integrated Reporting (IR); and King IV requirements.

 **CDP**
Providing investor information and disclosing climate change risks and opportunities.

 **Energy management and cost savings**
Understanding costs, risks and opportunities in reducing energy expenditure and carbon emissions.

 **Carbon Tax**
Prepare and be ready. Understanding and implementing the requirements set out by the Department of Environmental Affairs.
