

CARBON CALCULATED

Measure | Verify | Manage

Carbon Calculated is your partner for measuring, reporting and minimising GHG emissions in all facets of your business.

Our Services

- ◆ **Carbon footprint calculations and reporting**
Carbon Calculated's core focus is carbon footprint calculations and analysis. Our carbon footprint reports adhere to the internationally recognised best practice Greenhouse Gas Protocol (GHG Protocol) accounting and reporting standards.
- ◆ **Interpretation Reports**
A Carbon Calculated Interpretation Report provides a deeper understanding of the client's carbon footprint as well as the greater carbon landscape. Each report covers a range of topics, customised to the needs of the client.
- ◆ **Carbon tax consultation and calculation**
Prepare and be ready. With the implementation of carbon tax an imminent reality in South Africa, it is important that your business is prepared. Carbon Calculated can assess your business' potential carbon tax risk and identify innovative ways in which to reduce this liability. Our team can also help you determine unique business opportunities associated with carbon tax.
- ◆ **NAEIS submissions**
Carbon Calculated fully supports the process of submissions to the National Atmospheric Emissions Information System (NAEIS) in South Africa.
- ◆ **CDP submissions and checks**
Carbon Calculated assists with the transparent disclosure of risks and opportunities of climate change and carbon reporting.
- ◆ **Verification**
Third-party verification provides investors with a guarantee of reporting claims. Carbon Calculated can assist in verification of carbon related reports, events and operations.

◆ **Science-based target setting**
Setting targets to help keep global temperatures below a 2°C rise shows climate change leadership and forward thinking. Be ahead of the curve with the help of our experts who provide step-by-step guidance for setting science-based targets for your business.

◆ **TCFD recommendations**
Partner with Carbon Calculated to implement the Task Force on Climate-related Financial Disclosures (TCFD) recommendations in your organisation.

◆ **CarbonKnown – online software solution**
CarbonKnown is a South African designed and developed carbon and environmental management software solution, offering real-time measurement and reporting of organisations' carbon emissions and other sustainability data, including tracking against established targets. CarbonKnown can be customised to the needs of any organisation.

◆ **Data management platform**
The carbon landscape is changing from a voluntary, annual practice to reporting more frequently. Consequently, the need has arisen to manage and reflect on consumption data at regular intervals. Carbon Calculated will manage your incoming data capturing either through an online platform or manually at timed intervals suited to your business' needs.

◆ **Other Services**
We also offer a range of additional services including sector benchmarking, carbon footprint feedback sessions and lunchtime talks, employee climate change perception analysis and corporate value chain engagement.

◆ **Carbon Calculated's bundled services**
As carbon reporting, regulation and taxation evolve, so do the needs of businesses wishing to stay compliant and competitive. Recognising this complexity, Carbon Calculated has developed a new, bundled service offering.

Carbon Calculated's bundled service offering provides clients with the opportunity to move away from fragmented carbon management and allows the flexibility to select services most relevant and applicable to your specific carbon journey.

Carbon Calculated – the mark of trusted partnership
